PROFESSIONAL SUMMARY

Computer Engineering graduate with practical experience developing full-stack web applications using Python, Django, Flask, React, and TypeScript. Experienced in building REST APIs, database-driven systems, authentication, API integrations, and responsive frontend applications, with a strong focus on writing maintainable and scalable software.

EXPERIENCE

Cloco Nepal Inc.

Software Developer Fellow

Nepal

Jun 2026 – Aug 2026

- Worked with TypeScript, React, TanStack, SQL, and Django REST Framework to build full-stack application features.
- Built Hisab Kitab, an expense-settlement app for splitting and settling shared expenses among groups.
- Adopted Husky pre-commit hooks to enforce linting across the team's TypeScript codebase, used UV for dependency management, and worked with Gitea for version control.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C++, HTML, CSS

Backend Frameworks: Django, Django REST Framework (DRF), Flask

Frontend: React, TanStack Query, TanStack Router

Databases: PostgreSQL, SQLite, MongoDB

ORM / ODM: Django ORM, SQLAlchemy, Mongoose

ML / AI: MediaPipe, OpenCV, ST-GCN, K-means Clustering, Gemma LLM (Ollama)

Tools & OS: Git, GitHub, Postman, VS Code, Jupyter Notebook, Linux

Soft Skills: Problem-solving, Attention to detail, Time management, Adaptability, Communication

PROJECTS

Hisab Kitab | TypeScript, React, TanStack, SQL, Django REST Framework

Jun 2026 – Aug 2026

- Expense-settlement app enabling groups to split, track, and settle shared expenses.
- Built with a React/TanStack frontend and a Django REST Framework backend backed by SQL.
- Implemented cookie-based JWT authentication, password recovery, loading and error state handling, and an interactive dashboard with URL-persistent search, filter, and pagination.
- GitHub: github.com/sambad-K/Hisab-Kitab-An-expense-settlement-web-application

Real-Time Dance Guide System | Python, Django, DRF, ST-GCN, MediaPipe, OpenCV

Aug 2025 – Mar 2026

- Django backend with ORM across 2 models; DRF REST API with 5 endpoints (login, test, practice, result, profile) for pose analysis, progress tracking, and session data.
- Google OAuth integration for user login; MediaPipe + DTW pipeline scoring 17 COCO keypoints per frame for movement accuracy.
- ST-GCN for dance analytics; Gemma LLM via Ollama for natural-language session feedback; OpenCV for frame processing; videos and cache stored on local file system.
- GitHub: github.com/sambad-K/Realtime_Dance_Guide_System

Luggage Tracking System | Node.js, Express.js, MongoDB, Dialogflow, JWT, Nodemailer

Sep 2024 – Feb 2025

- REST API with 8+ endpoints across 7 MongoDB collections; OTP verification, SHA-256 hashed LTP, and JWT admin auth for secure claim processing.
- Nodemailer automated notifications for 3 status events (reported, matched, recovered); hybrid NLP chatbot via Dialogflow and native JavaScript libraries.
- GitHub: github.com/sambad-K/Lugage-Tracking-system

EDUCATION

Himalaya College of Engineering

B.E. in Computer Engineering – Tribhuvan University

Chyasal, Lalitpur

Apr 2022 – Expected May 2026

SOS Hermann Gmeiner School

Higher Secondary Education – Science (+2)

Sanothimi, Bhaktapur

Aug 2020 – Jan 2022
